DiaMine Explorations Inc. Receives Recommendation of Aeromagnetic Survey Results

September 25, 2006 - DiaMine Explorations Inc. (DIEXF) is pleased to announce that the company has analysed the aeromagnetic survey prepared by Terraquest Limited and Scott Hogg & Associates.

Although no magnetic kimberlite was located, the survey does not rule out the possibility of an essentially non-magnetic pipe. DiaMine Explorations Inc. is currently considering several non-magnetic kimberlite detection methods in order to develop a comprehensive survey plan in the near-term. If future surveys indicate signs of a non-magnetic kimberlite, the company is currently developing concise strategies to maximise the value of the land packages.

A selection of kimberlite anomalies in the general area have reportedly been non-magnetic, with lower-level flights indicating kimberlite formations were present where previous aeromagnetic surveys indicated negative results.

With De Beers recent announcement that the 16 additional kimberlites surrounding the Victor pipe may extend the life of the mine past 12 years and KWG Resources reporting they are about to start their latest drilling program in the area, the Attawapiskat region is continuing to gain recognition as an active and promising area of diamond exploration.

DiaMine Explorations Inc. is a Canadian exploration company focused on exploring and developing diamond mining interests in the strategic kimberlite regions of Canada. The Company's exploration programme and team of highly specialized experts will concentrate on securing new opportunities for further exploration and development while utilising capital allocation analysis and advanced geophysical technology to maximise returns from its current holdings.

FORWARD LOOKING STATEMENT

This news release contains certain statements that may be deemed “forward-looking statements”. All statements in this release, other than statements of historical fact, that address events or developments that the Company expects to occur, are forward looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects”, “plans”, “anticipates”, “believes”, “intends”, “estimates”, “projects”, “potential” and similar expressions, or that events or conditions “will”, “would”, “may”, “could” or “should” occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward looking statements are based on the beliefs, estimates and opinions of the Company’s management on the date the statements are made. The Company undertakes no obligation to update these forward-looking statements in the event that management’s beliefs, estimates or opinions, or other factors, should change.

These statements are based on a number of assumptions, including, among others, assumptions regarding general business and economic conditions, the timing of the receipt of regulatory and governmental approvals for DiaMine’s proposed transactions, the availability of financing for DiaMine’s proposed transactions and exploration and development programs on reasonable terms and the ability of third-party service providers to deliver services in a timely manner. The foregoing list of assumptions is not exhaustive. Events or circumstances could cause results to differ materially.
