DiaMine Explorations Inc. Has Sent Samples Of Glacial Material To Laboratory For Analysis

November 15 – December 16, 08 DiaMine Explorations Inc. (DIEXF) is pleased to announce that the Company has located samples consisting of grains of glacial material from the drill holes.

The samples were taken to the True North Mineral Lab in Timmins, Ontario. Material was washed and screen sized. The fraction minus 40 plus 70 mesh, the preferable size range for kimberlite indicator minerals (KIMs), was separated and placed in a heavy liquid medium with a specific gravity of 2.6. The light material, which floated in this medium, was discarded. The material which sank formed the heavy mineral concentrate. All kimberlite indicator minerals have a specific gravity greater than 2.6.

The heavy mineral concentrate grains were examined under a binocular microscope. Those grains identified as possible KIMs were set aside, and samples so formed were sent to CF Minerals Ltd. in Kelowna, British Columbia for testing with the Scanning Electron Microscope (S.E.M.) and the microprobe. These instruments determine the chemical composition of the possible KIMs, and decide whether they are in fact KIMs. One KIM, a chrome diopside, was identified from the easternmost drill site mentioned above, and it was decided to move the drill up to the vicinity of the magnetic target itself.

DiaMine Explorations Inc. is a Canadian exploration company focused on exploring and developing diamond mining interests in the strategic kimberlite regions of Canada. The Company's exploration programme and team of highly specialized experts will concentrate on securing new opportunities for further exploration and development utilising capital allocation analysis and advanced exploration techniques to maximise value from its current holdings.

FORWARD LOOKING STATEMENT

This news release contains certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical fact, that address events or developments that the Company expects to occur, are forward looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. The Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change. These statements are based on a number of assumptions, including, among others, assumptions regarding general business and economic conditions, the timing of the receipt of regulatory and governmental approvals for DiaMine's proposed transactions, the availability of financing for DiaMine's proposed transactions and exploration and development programs on reasonable terms and the ability of third-party service providers to deliver services in a timely manner. The foregoing list of assumptions is not exhaustive. Events or circumstances could cause results to differ materially.
